CHAIR PERSONS

- 1)DR MV KRISHNA, HOD ,DEPT OF GENERAL MEDICINE
- 2)DR.RANGALAKSHMI, HOD DEPT OF ANAESTHESIA
- 3)DR KIRAN.B.R, PROFESSOR DEPT OF GENERAL MEDICINE

DISCUSSION:

- Mortality meeting was started at 2:35 pm.Welcome speech was given by Dr.Amruth and Dr.Geethashree H.C..
- Two mortality cases from the Department of General Medicine were discussed.
- First case was presented by Dr.Jashwanth,Postgraduate, Dept.Of General Medicine - Dileep Kumar,39y/M,IP No.14976 case of lobar pneumonia with sepsis with ICU stay for a week with progressive deterioration of the condition in spite of proper treatment and the patient was on ventilator due to respiratory failure which was managed by the anaesthesia team.
- Second case was presented by Dr.Swathi,PG,Departments.Of General Medicine- Shalini,37y/F ,IP No.21772 K/C/O Ataxia Telengiectasia since 7yr old with H/O recurrent respiratory tract infection diagnosed as lobar pneumonia. Inspite of antibiotic treatment based on blood culture growth,the patient's condition deteriorated and expired on 8/08/2023.
- Ataxia Telengiectasia topic was discussed in detail.
- Take home message regarding the cases were noted as, first case had delayed admission to the hospital by attenders who were unaware of whereabouts of the patient leading to detoriation of the condition.
- Second case complicated due to preexisting condition of the patient that is ataxia telangiectasia and kyphoscoliosis.
- The panel concluded that both the cases were well managed by respective units.

Date: 27/10/23.
